

server

browser

vreme

The diagram illustrates the interaction between a server and a browser over time. The server is represented by a green bar at the top, and the browser by a green bar at the bottom. Red arrows show the sequence of requests and responses: a request from the browser to the server, followed by a response from the server to the browser, and so on. A blue arrow at the bottom, labeled 'vreme' (time in Romanian), points to the right, indicating the progression of time.
